- Global and onsite — we deploy where you need us, when you need us
- Designed for government customers with products in secure spaces
- Extend the life of your equipment, protect your investment, and keep you up and running

PROJECTION SYSTEMS

From the smallest briefing rooms to the largest training environments, there's a Christie® projector that's right for your application and budget. We offer secure and TAA-compliant 1DLP, 3DLP, and DLP Cinema® laser projectors in a range of resolutions and a wide variety of brightness levels to deliver exceptional image quality, brightness, and versatility, that are also user-friendly.

1DLP projection

Our lineup of 1DLP laser projectors offers a variety of features and functionality your department needs to display critical information with ease, clarity, and reliability for any size space. Discover the difference you get with the lifelike colors of our BoldColor+™ technology, 4K resolution for sharp, easy-to-read data, built-in warping and blending, and passive 3D capabilities for delivering sharp & high-quality content and professional-grade electronics to keep your displays running smoothly.

3DLP projection

When your content, venue, and audience size demand higher brightness and larger screens, our 3DLP RGB pure laser projectors fit the bill. With up to 50,000 lumens, they deliver the performance your team demands. Built for long-lasting reliability and versatility, you'll benefit from outstanding color and contrast, smart monitoring features, omnidirectional capabilities, built-in warping and blending, advanced electronics, and a full range of connectivity options to satisfy your application, budget, and maintenance requirements.

DLP Cinema projection

For over 65 years, we've manufactured world-class cinema projectors and revolutionized the cinema industry as a pioneer in digital cinema projection. Today, in addition to more than 60,000 theaters worldwide, you'll find Christie DCI-compliant cinema laser projectors in military base cinemas, along with embassy and diplomatic locations worldwide, where people of all levels of government enjoy the same high-quality movie experience that civilians enjoy in movie theatres.

CUSTOMER STORY:
ENGAGING PROSPECTIVE STUDENTS

ANNAPOLIS, MARYLAND – In the Naval Academy Athletic Association's (NAAA) Ron Terwilliger '63 Center for Student-Athletes includes the Akerson Theater, a 180-degree immersive theatre designed to help inform visitors, prospective midshipmen, and their families about opportunities at the school.

Originally conceived as a visitors' center, the project evolved into a space that highlights the tradition and history of what it means to be a midshipman student-athlete. NAAA engaged Dimensional Innovations to design, integrate, and provide content for the Center and the Akerson Theater using a Christie® solution that includes HS Series projectors, Spyder multi-windowing processor, Pandoras Box® Server, and Mystique™ automated camera-based alignment and recalibration solution.

VIDEO WALL SOLUTIONS

We offer outstanding visual display technology and engineering expertise to successfully implement the most advanced video wall solutions. Whether it's information sharing, entertainment, or digital signage, we can tailor a display solution for your needs. Choose one display technology or combine multiple platforms to create impressive displays that inspire collaborative information sharing.

LED video walls

Our indoor LED tiles provide unmatched choice, versatility, and flexibility for specifying high-performance video walls. From premium options for critical viewing and Active 3D applications for high-impact installations, our LED video walls help you communicate and share your content in vibrant and engaging ways.

Our proprietary, TAA-compliant MicroTiles® LED video walls let you build your display in virtually any shape or size and create inside or outside 90-degree corners, and concave and convex curves.

CUSTOMER STORY:
CONMY HALL

The historic Conmy Hall, a 35,000-square-foot space in Washington, DC, features a state-of-the-art 144' LED video wall used during ceremonies and presentations hosted by the U.S. Army and the White House.

The historic Conmy Hall, a 35,000-square-foot indoor space located in Washington, DC, is used U.S. Army, The White House, and the Department of Defense to host important ceremonies and presentations.

The key component of Conmy Hall's AV solution is a state-of-the-art 144' video wall. The 12,000,000-pixel wall required the most sophisticated imaging technology on the market, including an array of Pandoras Box® and a Christie Spyder X80 multi-window processor.

The expansive LED wall required a 25' automated pull-out entryway to be built directly into it, creating a retractable doorway that opens with the push of a button. The result is a truly extraordinary seamless video wall that spans the width of the venue and offers optimal viewing from every seat in the hall.

The centerpiece of Conmy Hall's renovation: A massive 144' LED video wall made up of Christie LED tiles. The renovation was led by The Bridge Group, with video systems integration and installation by Quince Imaging.
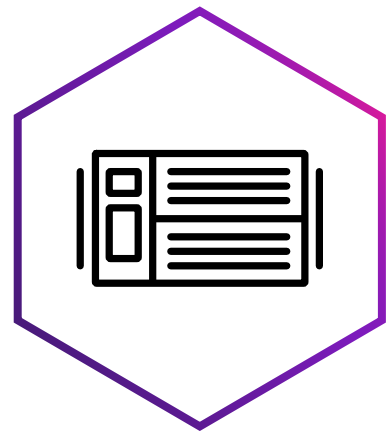

CONTENT MANAGEMENT AND PROCESSING

Get the most out of your Christie® display solution by combining it with our powerful content management and image processing technologies for a complete, end-to-end AV solution.

Our range of image and video wall processors make it easy to design customized, integrated video wall solutions for your:

- Command and control centers
- Briefing centers and boardrooms
- Tactical operation centers

Hedra
For mission-critical operations, Christie Hedra™ video wall processor is your simplified, secure control room solution. Designed for mobile command centers and smaller control rooms, Hedra helps you take control of your data without latency as you securely display, arrange, and operate multiple sources.

Terra
Christie Terra® SDVoE (Software Defined Video over Ethernet) solutions include everything you need for direct integration into 1DLP and 3DLP projectors and MicroTiles® LED with uncompressed, zero-frame latency, artifact-free content over 10G networks.

Spyder X80
Simply the most powerful multi-screen windowing processor available, Spyder X80 offers performance, control, and flexibility for the most spectacular visual experiences imaginable. Spyder X80 is ideal for the most demanding applications such as high-end visualization and simulation.

Pandoras Box
Our award-winning Pandoras Box® family of hardware and software tools power real-time video playback and processing, from single-display fixed installations to complex, multi-display spectaculars. Perfect for your government training environments, simulation, and live events.

Discover how Christie Hedra can empower your control room

CHRISTIE PROFESSIONAL SERVICES

As one of the industry's most trusted advisors in designing, building, deploying, and supporting professional AV solutions, and with more than 95 years of experience, we understand that downtime is not an option. Our work doesn't end at installation — it's when our fully customizable professional services begin. Think of us as an extension of your AV personnel, ready to support your mission.
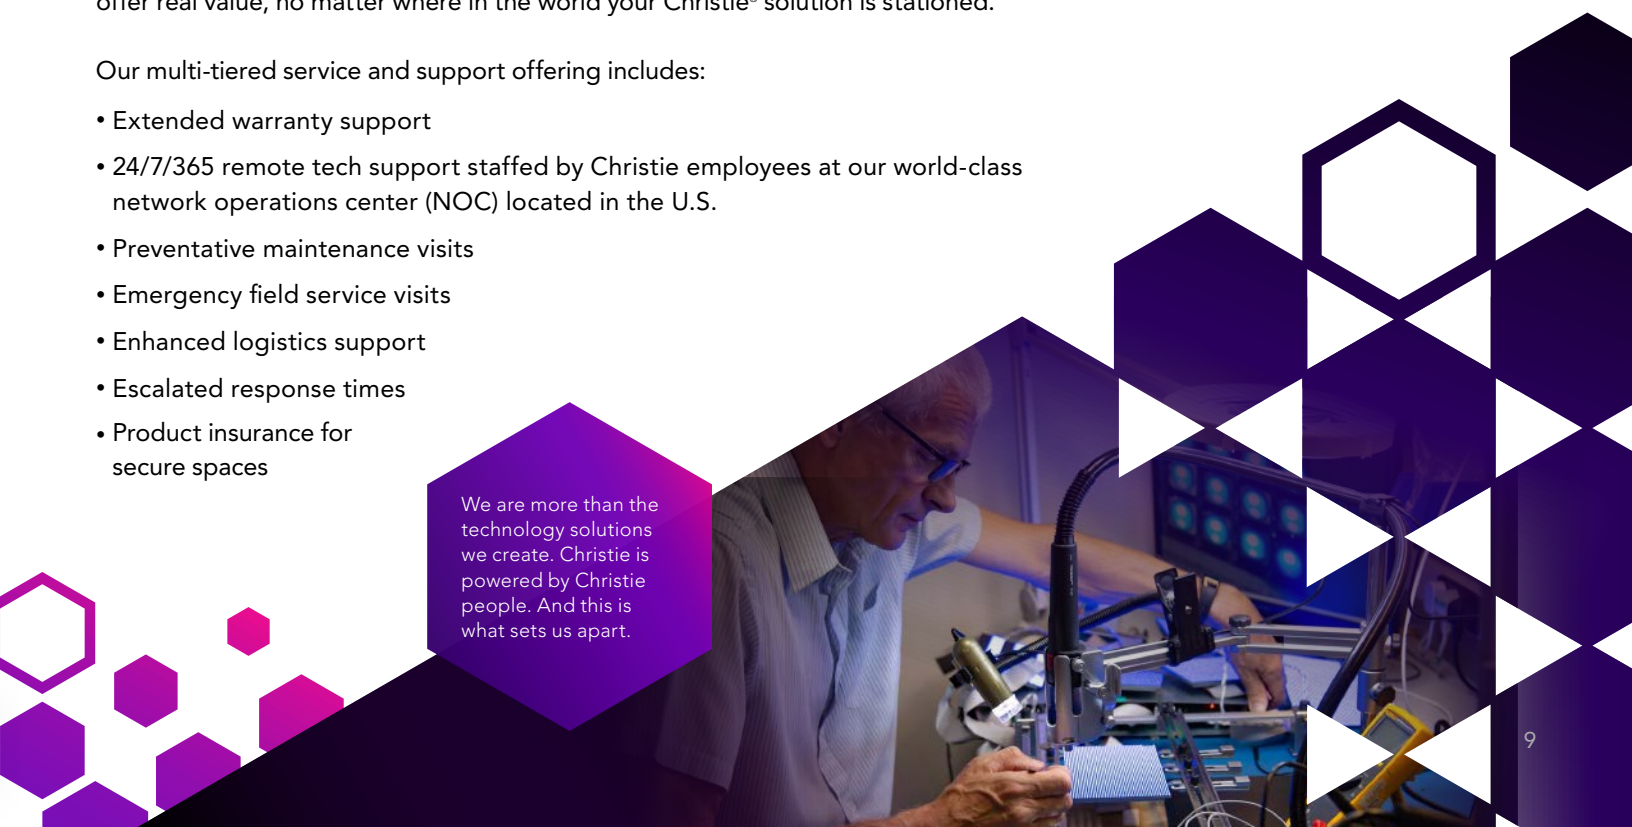

Flexible and customizable support

We know there's no such thing as a one-size-fits-all solution for government customers, so why compromise? We're here to help customize the services that help you complete your mission, 24/7. Let's talk. Together, we can identify service-level targets and agreements that protect your investment, give you peace of mind, and offer real value, no matter where in the world your Christie® solution is stationed.

Our multi-tiered service and support offering includes:

- Extended warranty support
- 24/7/365 remote tech support staffed by Christie employees at our world-class network operations center (NOC) located in the U.S.
- Preventative maintenance visits
- Emergency field service visits
- Enhanced logistics support
- Escalated response times
- Product insurance for secure spaces

We are more than the technology solutions we create. Christie is powered by Christie people. And this is what sets us apart.
